#### MIND READING TRICK

Ask a friend to choose any number from 1 to 50. Now tell him to write it down and put a circle around it.

Now tell him to add 4

then add 7

then take away 2

then add 3

Now tell him to take away his original number (the one with the circle around it).

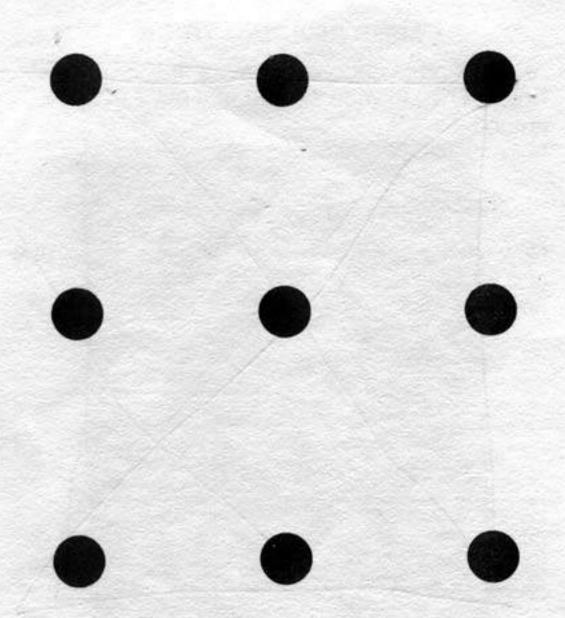

now tell him to add 4

times by 2

take away 3

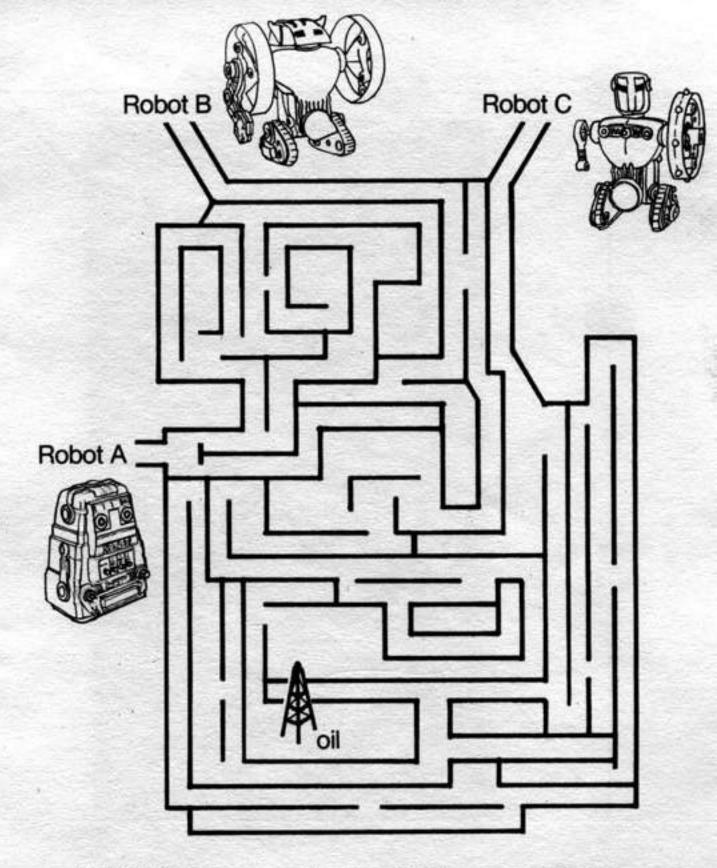

#### HIS ANSWER WILL ALWAYS BE 29

How this is done. Since you tell your friend to take away his original number the answer will always be 29. Try it with any original number, the answer will always be 29.

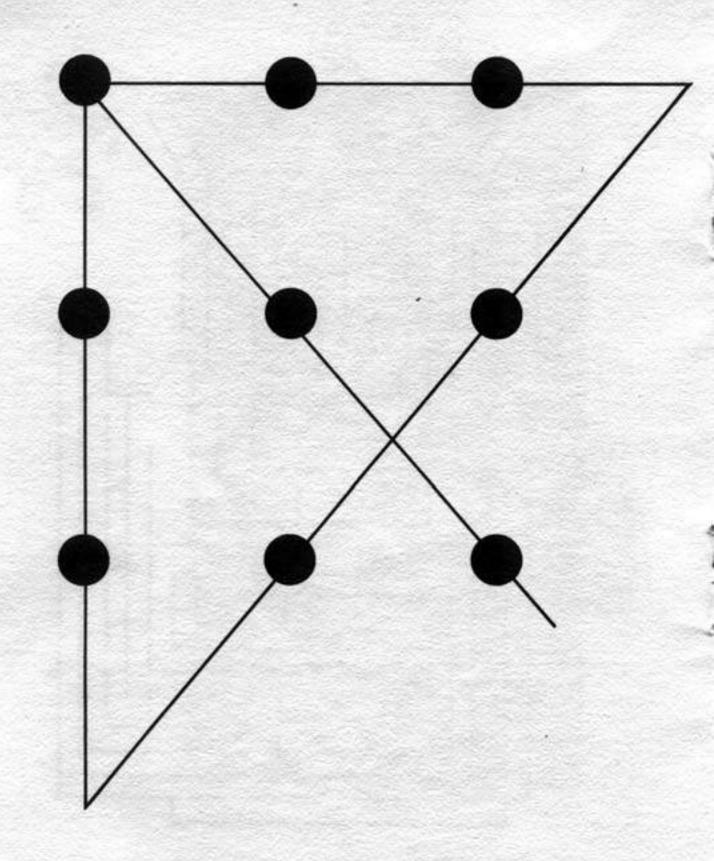

Can you connect all nine dots with 4 straight lines without lifting your pencil off the paper?

If you can't, the robot will give you a hint and tell you where you can find the correct answer.

Which Robot can get to the oil? If you can't figure it out, the robot can help you.

THIS IS THE ANSWER TO THE QUESTION ON PAGE 5

#### **CROSSWORD PUZZLE**

1		2			3		6
4	5						
7				8			9
	10		11				
14							
15	16		12			18	20
13						21	
17				19			

#### **ACROSS**

- 1. Opposite of light is
- 3. Middle of a hurricane.
- Opposite of lost.
- Abbreviation of northwest.
- A person who loses a lot of weight is now
- 10. Fish that can shock you.
- Another word for beneath.
- 13. Man with no hair.
- Opposite of gravity is which direction.
- Difficult prefix meaning "in".
- 19. Charlie's angel Cheryl
- Abbreviation for northeast.

#### DOWN

- A tackled football player goes \_\_\_\_\_.
- To move quickly.
- Sixteen divided by two.
- 5. To borrow.
- What an elevated train is called.
- A negative response.
- 11. Sound at high volume.
- The inner circular rubber piece often found in a bicycle tire.
- A flat dish used for frying food.
- Opposite of the beginning.
- Color of Riding Hood's cape.

#### **MAGIC SQUARES**

MAGIC SQUARE NUMBER 1

Notice how the columns, rows, and diagonals all add up to 15

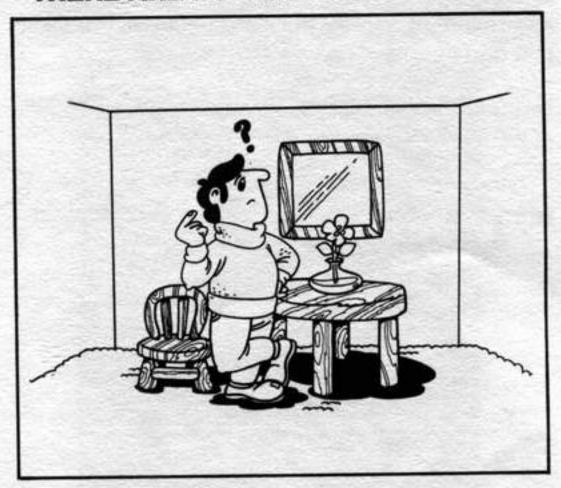

4	9	2
3	5	7
8	-	6

Can you make these magic squares add up to fifteen also? If you can't the robot will tell you where to find the answer.

	6
4	2

7	5	
2		,

## THERE ARE NO WINDOWS OR DOORS

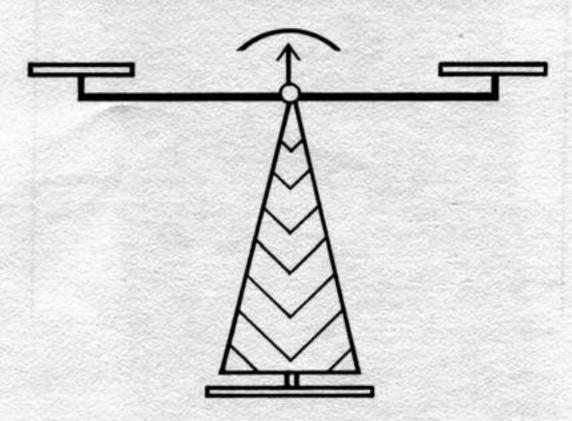

HOW DOES THE MAN GET OUT OF THIS ROOM? THE ROBOT WILL TELL YOU.

#### A DIFFICULT PROBLEM OF WEIGHT

Pretend that you have a balancing scale, 8 marbles (that look exactly the same) but you are told that one marble is heavier than the rest.

Using the balancing scale, with only two chances at the scale, can you find the heavier marble.

Try to work this problem out by yourself. The answer is on page 13 in case you cannot do it.

#### **PROGRESSIVE WORDS**

By changing one letter at a time, can you change the top word in the boxes into the bottom word? Each row must be a new word that you know. For example, here is how MAKE can be changed into DATE.

М	Α	K	Ε
R	Α	K	E
R	Α	Т	E
D	Α	Т	Е

Now try these on your own. If you have trouble, the answers are on page 14.

	D	1	М	Ε		М	Α	L	Т
#1.					#2.				
	S	Α	L	Ε		S	Α	М	Ε
						J	0	K	E
					#3.				
						S	0	L	Е

### **ANSWER** to problem from page 11

Place 3 marbles on one side and 3 on the other side of the balancing scale. If one side goes down, you now know it is one of these 3 marbles and you still have one chance left at the balancing scale.

From these 3 marbles, take any 2 and balance them. The heavier one should be obvious. If they should balance, then the one you left off must be

the heavier marble.

It is possible that when you placed the original 6 marbles on the scale (3 on one side and 3 on the other) that they would balance. If they do, use your remaining one chance at the scale to balance the 2 marbles that you left off. The heavier marble should be obvious.

## **ANSWER** to MAGIC SQUARES from page 9

8	1	6
3	5	7
4	9	2

6	1	8
7	5	3
2	9	4

## **ANSWERS** to WORD PUZZLE from page 3

		_	_	_		_	_	_				_	_	_	_	R
